

KEYSTONE Hardware Requirements - October 2, 2009

Single-user (stand-alone)

Component	Minimum	Recommended
<i>Processor</i>	Intel / AMD 2 GHz	Dual / Quad Core
<i>Memory</i>	1 GB	3 GB
<i>Hard Drive</i>	80 GB	SATA-II
<i>Display</i>	1024 x 768	1280 x 1024
<i>Operating System</i>	Windows 2000 / XP	Windows 7 / Vista

Multi-user server

Component	Minimum	Recommended
<i>Processor</i>	Intel / AMD 2 GHz Dual Core	Dual CPU, Quad Core
<i>Memory</i>	4 GB	8 GB
<i>Hard Drive</i>	80 GB	SATA-II or SAS
<i>Display</i>	1024 x 768	1280 x 1024
<i>Operating System</i>	Windows 2000 Server	Windows Server 2008 / 2003

Multi-user workstation

Component	Minimum	Recommended
<i>Processor</i>	Intel / AMD 2 GHz	Dual / Quad Core
<i>Memory</i>	1 GB	3 GB
<i>Hard Drive</i>	80 GB	
<i>Display</i>	1024 x 768	1280 x 1024
<i>Operating System</i>	Windows 2000 / XP	Windows 7 / Vista

Important Notes

1. KEYSTONE is compatible with Windows Vista and Windows 7 by adjusting the operating system's default security settings.
2. Additional processors/cores will increase the performance of KEYSTONE and other applications and are strongly recommended.
3. Each KEYSTONE user must have Windows administrator privileges.
4. An Internet connection is required at each separate location.
5. KEYSTONE requires a hard-wired network connection for all servers and workstations. Workstations using a wireless network connection must be configured to run KEYSTONE using Remote Desktop.
6. KEYSTONE Datascope requires additional memory on each workstation where it will be used.
