

KEYSTONE GPS

AN ESSENTIAL TOOL

With critical deadlines driving so many of your customer's projects, an effective Mobile Resource Management (MRM) solution has become an essential tool for managing product delivery.

Keystone GPS software enables you to increase driver productivity, reduce vehicle costs, improve driver safety and enhance customer service.

SYSTEM HIGHLIGHTS:

- Easy to recognize icons change color based on current vehicle status
- Vehicles that are not on jobs turn red if stopped for longer than a specified duration
- User defined speed limit alerts
- Automatic, semi-automatic, or manual status updates
- History trails and reports
- Easy to use polygons illustrate your geofence for plants and job sites

KEYSTONE GPS

HIGHER VISIBILITY MEANS GREATER EFFICIENCY

When your dispatchers know the exact location of each vehicle, as well as current status and when they will be returning, they can make more cost-effective scheduling decisions. Keystone GPS also promotes safer driving habits and decreases vehicle idle time. **That kind of efficiency has a direct impact on your bottom line.**

WHY CHOOSE GIVENHANSCO KEYSTONE GPS OVER THE COMPETITION?

- Keystone is a **software based** system that is not tied to any particular hardware device. **Keystone GPS is compatible with many different types of GPS hardware. Keystone can interface with cellular phones, digital radio systems such as MOTOTRBO Professional Digital Two-Way Radio Systems , GPS modems and more!**
- Keystone is affordable and easy to use, and **there are no monthly monitoring fees with Keystone GPS.** Keystone is not an ASP so we do not host or store data; your information remains safely with you.
- **Keystone GPS is flexible.** Keystone GPS is part of our integrated suite of Keystone products. You can use Keystone GPS as a stand-alone system, or enhance your GPS experience by combining it with Keystone Dispatch or interfacing with dispatch systems from many other manufacturers.*
