

GivenHansco Keystone Hardware Requirements – 2015

Single-user (stand-alone)

Component	Minimum	Recommended
Processor	Intel / AMD 2 GHz	Multi-Core 2.5 GHz or higher
Memory	2 GB	4 GB
Hard Drive	250 GB	SATA-III
Display	1280 x 1024	1280 x 1024
Operating System	Windows 7	Windows 8.1

Multi-user Server

Component	Minimum	Recommended
Processor	Intel / AMD 2.5 GHz Quad Core	Xeon 3 GHz or higher
Memory	4 GB	8 GB
Hard Drive	250 GB	SAS w/Raid
Display	1280 x 1024	1280 x 1024
Operating System	Windows Server 2008 *	Windows Server 2012 R2 *

*NO Small Business Server

Workstation

Component	Minimum	Recommended
Processor	Intel / AMD 2 GHz	Multi-Core 2.5 GHz or higher
Memory	2 GB	4 GB
Hard Drive	250 GB	SATA-III
Display	1280 x 1024	1280 x 1024
Operating System	Windows 7	Windows 8 .1

Important Notes

- **NO** Windows Small Business Server
- Additional processors/cores will increase the performance of Keystone and other applications and are strongly recommended
- An internet connection is required at each separate location
- Keystone requires a hard-wired network connection for all servers and workstations. Workstations using **REMOTE/WIRELESS** network connection must be configured to run Keystone using **REMOTE DESKTOP** to maintain data integrity.
- Keystone Datascope/FX require additional memory on each workstation where they are used.
